Who is the PFBC biologist for the area and what is his opinion?

He's closely involved in this unfolding drama and will continue to study the stream iot provide data for management decisions. I've discussed the topic at length with him and I'm sure his personal opinion/recommendations have been sent up through channels. Ultimately, this decision will be made by the Executive Director.

Again, I'd ask for some patience on this matter. A few too many rumors and speculation are floating around in the fly fishing community. I'd like to reiterate: contact Mr Arway with your personal views as nothing is set in stone at this time.
