[USGS report on South Newark Basin](#). I don't think there's a single hole that's been drilled; it's based on what other similar basins have produced or have been calculated to produce. Instead of the outrage at the legislators that make sure they protected their districts, why not turn some of that towards the legislators that ensured their districts were pillaged?

For those that are outraged, do you live in Bucks or Montgomery County? If not, is it envy of the legislators that are looking out for their own?
