so what is the deal with light and and the fly and when it work and if there is something you know can you tell please so i can learn.

i fish hickory creek today again and have been doing good but today fish the green weeny fly and got nothing so i do not know why some people say it is is good all the time and catch fish and some say it depends on the light i so not understand. i fish it under bobber thing and pull in like streamer but nothing.

what do you think i like to know
