Yes, past biologist reports DO show the number of fish over 14" in the TT section. The TT regs went into effect in 1995. Here are the numbers of 14" and above fish in the surveys since then.

1997: 48 fish/mile

1999: 82 fish/mile

2001: 222 fish/mile

2005: 381 fish/mile

2007: 251 fish/mile

2012: We don't know yet, but initial reports look positive, my back of the envelope calculation on a sub-sample was in the 350's.
