Good news.

I'm an avid bass guy who would like to see the PFBC try out cold water releases from Raystown and the establishment of a trout fishery. There's nearly 100 miles of the Juniata River downstream for us WW guys not to mention the lake itself, Frankstown Branch and LJ upriver. Sure, there's likely to be some protest from local anglers but I'd imagine the enthusiasm statewide from the trout community would be much greater. Definitely worth a try (at all the lakes).
