Chaz is correct..thats why if you ever fish the Rapid River system in Maine and you catch a smallie...big or small throw them up on the bank an let them die.

I would be all for the brookie thing Chaz,alot of folks though prefer the non native Brown Trout and Rainbows..thats fine your milage may vary.

Ill take brooks,rainbows an then browns hell might as well add goldens, all the distinct species of cutthroat and maybe some bull trout too..can they get some marble trout,maybe some Yammame and cherry trout,a few taimen.....ect
