First off, you want to hunt these fish, don't just blind cast. Stalk the fish wearing camo or earth tone clothes not bright clothes. When you cast, cast well above the fish and let it drift drag free with a long leader. When you stop your forward cast, stop high so the line will have to flutter onto the water and don't slap your fly down, let it drift down to the water. If you do these thing and present your fly further up stream from the fish, you will have more hook ups. Go to the Federation Of Fly Fisherman website and watch thier casting videos and they cover all this
