I almost always fish upstream - wading very slowly so that you don't put ripples over the fish. And, the closer you can get to the fish - the easier it is to make a good presentation IMO

It's surprising how close you can get to large wary fish by moving carefully. I do this all the time on the Delaware river - which is known for it's very challenging wild fish.

And making a soft cast - so that the fly lands gently - is something you just have to get the feel for. Aiming high - as frequent tyer pointed out - is the key. Be worth practicing IMO
