The PA TU Trout Management Committee decided to take no action at this time on this issue,
"3. Penn's Creek: It has been proposed to change the TT section of Penn's Creek to CR. Some of the TMC membership attended the public meeting on this proposal and reported significant opposition from the landowners. Since all access to this area is on private land and the rule change could increase angler use, it is clear that public access is the most important issue for this section of Penn's Creek. "
There is general agreement among the Committee that the regs are good the way they currently are.
