If you want fluke then you are gonna need a sinking line. Any fly will work but the key is to be on the bottom or as close as possible. If you going for them with your spinning the best way is a bucktail teaser combo. Get a bag of gulf and you catch all the flatties you want. The rig is basically a dropper loop with a foot gap to the bucktail. Get the gulp 4 inch swimming mullet it white or green and go to work.

I don't really know de but right around that time is when the mullet start to show in jersey and all hell breaks out.
