Was by the Loyalhanna this weekend - east of rt. 711 and noticed a ton of work being done to improve habitat and create current. There must have been a dozen wedge deflectors, jack dams, and other bank improvements items done all in a week's time over just a 100 yards or so section of the stream.. I was wondering if anyone knew who was sponsering the work? I won't mind donating time or \$'s since I fish that area often.
