Mike, everything that SBecker and LehighRegular have stated is quite true regarding the Pohopoco (and the Lehigh River.) In November 2010 I moved to this area in large part because I wanted to be closer to the Lehigh and Po. I hope the PFBC takes a stronger look at helping protect AND enhance the trout fishery in these two streams. I'm currently finishing out my final term as Forks of the Delaware chapter president and hope to get more involved in my new "home waters." However, when a concerned angler can't even get a requested call back from the county WCO it's discouraging, I know these guys are busy but a simple call back goes a long way. I know if it were in Northampton County that angler would've definitely been called back.
