That "wall" is new for this season, was built of the winter (2011/2012). You can walk and fish most of that side heading back towards the IR Bay all the way to North Shore Marina.

Check out the "pipes" behind the marina as well. You can walk alot of bank area back there as well. Where pants and long sleeves though in the evening/morning, flies have been brutal.

Don't be afraid of fishing the North jetty ocean pocket early AM/late/dark...
