I use 25 pd flour,catch many bluefish up to five pounds and never lost a lure.Of course you know to hose off your tackle-flies and lures included.If you have to change fly or lure do not put them back in the cheap plastic carry box[hint] until rinsed and dried.Try not to open box if you don't have to but if you are the changing type,take all you intend to try out of box before you get salt on your hands.
