The employee is correct. However I am sure if you were to have explained that to them they would have understood.

Perhaps approaching the Allenberry management or that employee again and asking to talk this through. Suggest that perhaps a few "handicapped" spaces in the meadow be allowed.

Is this something the CVTU could coordinate?

This is and has been an ongoing issue there. While it is likely they would never close access to this popular stretch, it is always good to respect the landowner, in this case the Allenberry.
