Depends where I'm fishin, I guess, Osprey! Limestoners, I'm rockin' black foam ants, grasshoppers, beetles, all the summertime treats. On the small mountain streams, I've been rockin' caddis and green weenies.

The bass, its been all kinds of different stuff. The other night I was catching them on a size 10 royal wulff! It almost becomes a game like, "I wonder if THIS fly could catch a bass!"
