Were the bears chowing down on the berries in the stream valley bottoms?

Funny you ask this Kevin. I was seeing numerous berry laden scat piles along the stream. So many in fact, that it caught my attention. I saw the first bear (small) up past the "big hole" and the second one, the biggest (300lbs), near the middle. I couldn't believe how fast he ran up the VERY steep mountainside!!! The third one I saw down near the ford on my way out.
