are the snakeheads around enough up in the bucks county area to target them specifically? in a pond near me we found a dead one, mostly eaten. estimated at about 15 inches, head was left, thats how we i.d. told caretaker. pumped out the pond most of the way and checked every fish in it. it was the only one.

Not sure about Bucs but they are Filthy in the tidal Potomac . Also they are in Fdr park and the Delaware river us far up as Trenton . Several lakes in Delaware and New Jersey also have big populations.
