My family has a cottage in NW PA near some great bowfin fisheries. I only fished Conneaut Lake once, but I have fished the Geneva Swamp(conneaut marsh) and French Creek and have seen dead bowfin along the banks of both places. And the sad part is some of these people who are killing the bowfin know they aren't snakeheads, but they still think the bowfin eat all the other fish. PIB, Conneaut, Geneva, and French Creek are all fantastic fisheries. The bowfin aren't having any effect on the other fish there.
