Brownie,

Welcome to the Paff forums. This particular forum, Stream Reports, is for past tense, actual fishing reports, rather than inquiries about where to fish. To be honest, many of our forum members are tight lipped about wild trout streams, particularly in areas such as Chester County. The PFBC Class A and NR list are your best bet. The fact that you didn't find many streams.... is because there aren't many in that part of the state. If you've really got the itch for wild trout, you might wish to look more towards center state. With that said, try the Advanced Search function at the bottom of the page and try "Chester County" and you can see reports on the fishing opportunities there. We have another forum Stream Locations, that is currently unavailable due to a tech glitch.
