Thanks Mark!! As stated, that area is literally in my back yard and the work is exceptional. I cant wait until spring when the high flow and debris build-up carves the stream-bed into great trout habitat. In the heat of July I found large numbers of trout still in that very area, so maybe a hold-over population will survive. Post a site if directed donations or voluntier work can be provided, though with the Mellons funding I'm sure it's in good hands!!!
