Pcray,

What you refer to as a "tiny percentage" of streams on the wilderness trout streams list adds up to approximately 103 streams. 103 streams in Pennsylvania published and designated as either Class A, B, C, D as well as Wilderness Trout Streams list is a pretty good number of streams that are published. C'mon don't make me spell it out... it's getting tiring. It's like debating whether a car is gold or yellow. Who gives a crap enough to call someone out on that?
