V is for Valley. Though the very mention of this venerable SEPA waterway invites some untoward apoplexy, a certain threesome of PAFFers dared to wet lines there this morning and, by golly they liked it. Also liked was the temperate weather (upper 70's), the nominal breezes, the water temp (63) and the occasional sighting of deleriously wayward green or light tanned winged bugs (#18-#22).

Not to name names, BUT the above mentioned PAFFers MAY have included docsab, JTvolks-something and his plus 1. Pics of other likeable things in and around the V-word Creek included FREE!
