I'm sure there's fish in some of the smaller tribs. Not to spot burn or anything.

Walnut gauge spiked to about 170 today. I like to fish it in 100-150. It'll get the fish moving a bit, but by no means is the run going to really start. We need a 3-4 day period with 2.5" of rain... and 2-3 of those.

It's coming soon though.

Agreed. It always seems impossible that it will happen with conditions, but it happens every year like clockwork.
