How about "It's mine....ALL mine!"

You seem to be torn between the conundrum of having something of a fisherie you want to scream about from the roof tops yet don't want to share with anyone.

Simple, write your book and post the property. Then you can get your publicity without the fishing pressure.

If twenty years ago you were having 60 fish days during these sanctuary times and the phenomenon continues to occur it hasn't had an effect on the trout population that come there, only on your ego regarding the importance of your vigilance.

Look, if you think it is important and the F&BC does not, you own the land and they do not, you hold the Aces. Play your hand.

You can also post signs downstream in April indicating that the quality of the fishery is dependent on the steadfast management of the property owners locates on the cold water tribs for providing sanctuary during the summer months. Thank a property owner who posts. (another book title).
