Pretty much what Becker said about the food. It was nice to have food there and not have to quit fishing early to get to a resturant before closing time. Plue the wife could eat when she wanted and I ate when I came off the water.....Mainly you should use your standard flies for freshly stocked fish ie. egg patterns, buggers and the best bet is the chartruse green weenie in a large size. You will have a good time and yes the area is remote, but Petersburg is around 10 miles away. They have a PizzaHut, a Dairy Queen and.....wait for it.....a SHEETZ!.....second thought.....take food and don't forget breakfast stuff.....good luck
