JLW's... Yer my kinda flyrodder when you enjoy gill's and such as well as them trouts... As for fishing golf course ponds I'm always begging for permission to fish but seldom do I get the OK.. They always play the "liability" card and to be honest, as an occasional golfer myself, I feel the best place to get hit with a golf shot is near or IN the water !!!!! Hell I even took a signed, notarized letter relieving the golf club of any liability and they still said no...

So, I stick to public waters and small farm ponds that I gain permission on...

Best wishes

Frank
