Yeah I worked at a golf course for two seasons. Planned on putting some fish in the ponds but it never happened.

They are pretty tight about anything other than golf happening on the golf course. I am sure if there were fish in there I could have casually walked over to the pond on 18 and caught a few late in the evening as long as I was on the side that is out of play.

But I worked there. And its good to know what you can do and when you can do it.

The place I have found happens to be temporarily open to the public and I see nothing but a few old folks walking around the old cart paths, which are now lined with 3 foot high grasses, weeds and shrubs and small secondary grow. If hunting were allowed it would be a small game paradise. Hawks and eagles frequent the area.
