welcome to my world this crap happens everyday, and no one reports it. there is a gag order on doctors, papers, and news channels up here..only 10 % of what is happening is getting out to you folks. the pipes when they are going under roads and streams are coated in a mud/mineral oil to slide better. And you say this mud is ok !!! same thing has happened to a small wild stream a trib to pine and no news got out, you should smell the stuff.....heavy in a oil/petroleum smell, but thats ok its mud thats what they keep saying..

Wait a second. Who said it was OK?
