Have you considered night fishing around city island? There's pretty of lights around and it still holds a very good population of lunkers. I would certainly give it one shot...bet you go back for more. A yak would be perfect. Focus on the marina eddy and bridge abutments. I've heard reports of 30-60 fish nights with yields of 2-7 lbers. If you're a day tripper shoot me a PM and I'll put you on spots north of Harrisburg, south of town I can't help much.
