pwk,

Let say that, first off, I've been floating the river. In many instances, the riseforms are very subtle. Very subtle. And often times, they're mid-river, possibly unreachable to a wading angler.

That's not to say there aren't good spots that offer a wading angler a good shot at rising fish. But they're clearly are not all over the place.

I don't know how long you've been at this, but it does take time. Be observant, gather the help that some of the other guys here can provide. Its getting late already this year, but maybe next spring I can float with you down there and we can try to figure something out about this place.

Good Luck

Dave
