Nick and I were guiding this past weekend. Top feeders were hard to find but we did find some. Spring Creek produced the best surface activity. Water temps were good, 62-64, on Penns, Spring, Bald Eagle and Fishing Creek. We fooled fish on Blue Quills, Sulphurs and Ants. Largest was a 16 inch Rainbow. Mid morning and late evening produced the best action. Streamers were not productive. 80% came off the top.
