In particular, any standout patterns for spring? Looks like I am going to get 4-5 hours of fishing time Friday morning before my brother is done with class and he is ready to leave state college. They received 1-1.5 inches of rain, and i expected spring to be up and slowly come down, so i would be perfect for Friday. Not so, that water table must be down quite a bit, because the gauge is reminiscent of an erie trib.
