pray, by your definition this entire watershed including tributaries is a public resource. A public resource that if allowed to get out of the bag without protection will be no-longer. To have public wild trout fishing opportunities you must first have wild trout. As much as any other factor in this state, stocking and over fishing have damaged wild trout populations. The type of protection I would like to propose to the commis=ssion would be a huge undertaking and I doubt they would go for it. I could share without the worry which is The goal. Not everyone understands or cares about catch and release. You care about it being a public resource otherwise it doesn't exist. Many fisherman feel the same way about special reg sections. Particlarly Fly fishing only. This area doesn't have any spec. regs and trout fishing is stock truck put and take. There is a mind set that comes with this.

Open minded Ideas for protection and advise has always been the motive for this thread. I thought I was clear on my motive but apparently if you hang on this board too long you become narrow minded and argumentative. With a knock on a door anyone could discover this for themselves as I did. I want to protect it. Let's debate over weather or not I'm worthy of your praise. Please.
