Well I dont fish it often, but I do know you'll get some good browns 20" my best is only 18" but I've also seen pics of a couple #10 fish, so theyre are definately some good fish. If youre coming up in two weeks, check out the EBCR DALO, it will be getting stocked and im sure a bunch of summer holdovers have been feeding good with the cold flows should catch a bunch there for sure.
