Thanks sandfly. We ended up not really heading up past your way until the way home on Monday. I thought it was a little odd in that most of the other smaller tribs I saw this weekend still had water at their mouths. Asaph's twin one valley to the east had water at its mouth. We got into some Brookies on one smaller run, but spent most of our time on the bigger streams. Did real well on Smallies on Pine.

Drove over the bridge on Marsh, but didn't stop and look down.
