Just got back from my first trip to Harman's on Sunday. Was down there Friday night and Saturday night. Reading the reviews on here, I knew I had to make a trip down there. Convinced the wife to go down and booked the cabin about a month ago. Took a little over 3 hours from Washington County. Really nice drive. As soon as we got down into the area, I instantly knew how a lot of you guys fell in love with the place.

Here is the big hole at the entrance to Harman's(sorry a couple of the pics are so big..couldn't get it to shrink down for some reason)

After checking in we headed down to our cabin which was across the bridge, which we saw a bald eagle

carrying a trout out of the creek. Water looked a little low to me, but it was up considerably from where it was.

Got settled into our cabin, which was again, first class.

View from the porch.

Got out for a little bit the first evening but didn't have any luck.

The next morning I got up at daylight and hit the creek. Surprisingly I was the only one on the creek for at least the first hour and a half of daylight, or so I thought. While looking downstream I noticed the bald eagle again messing around in the creek.

The size of these trout was really impressive. Ended up catching 13 on Saturday with the average being right around 17 inches. This is an average trout at Harman's. I caught them on san juans, black wooly buggers, various nymphs. I just started fly fishing earlier this year, so this was by far the most action i've had with a fly rod.

Made a trip to Seneca Rocks which was about ten minutes from the property. Pretty wild to see all of the rock climbers hanging from the side EVERYWHERE.

All in all, I would definitely go back to Harman's. The facility was top notch, the scenery was incredible, and everyone I met on the stream was extremely nice. I can't wait to get back down to this area again.
