fly-flinger,

I own that map. I actually recieved 1 with a year subcription to the local news paper (the laminated 1). What a great deal. It is a littel hard to read because it is so cluttered, but it comes with a manual.

If I am in a hurry, i use the GIS map on the fish commission site -- it's hard to locate though since they swithced everything around. My suggestion is if you find it, save it under you favorites. It gives you mapquest corrodinates .
