What is odd to me is less people fishing for trout in the fall .. beautiful time of year to be on the water as much as you can.

Yep - agreed. The fall is far and away my favorite time of year and I do a lot of trout fishing then. However, for most of the outdoors men in PA, the autumn is for other pursuits, mainly hunting. They simply associate fishing with the spring and summer months and mainly springtime for trout. Fishing pressure really drops off in the Sept-Nov period. This is also true for bass: rivers that were pounded by bass guys (not to mention all the kayakers, tubers etc) in summer are nearly vacant by Sept.

Good for guys like us who want to fish this time of year. 😊
