Dear geo,

I absolutely loved Fish Pimp indicators when they first came out until I lost every one I owned exactly like you are losing them. They fell off if I farted.

I really like the "Turn-On" indicators. If you put them on correctly you will never lose them. Sometimes they are a pain in the butt to remove if you don't remember how many turns you used to put it on or which direction you turned it but they never fall off on me.

Regards,

Tim Murphy 😊
