I might be wrong but i'm pretty sure it was George Harvey that "invented" the three hackle dry fly , yeah , ol Joe used it in his book , but i'm willing to bet that's a Harvey fly. Having said that and having used that type of Catskill fly alot over the years , i think the pure and simple reason it works is that it creates a larger buzz which traps a larger air bubble therefore it floats higher and longer. Not tryin to be a smart azz here but give credit where credit is due , ol Joe had an even better teacher in George.
