(I assume you mean Wipers)

1WT,

The tailrace below Conowingo is tidewater and the stripers there are wild striped bass from the Chesapeake Bay, not "wipers." The PFBC stocks wipers in the Susky up here in PA.

Neat report BTW. We don't get many striped bass reports from Maryland very often. I've had some great fun on juvenile stripers in the bay if you time it right (usually this time of year) and hit the schools.
