I knew it would suck before it ever got here, and now that it's here, it sucks even more than I thought. the nasty fumes, noise, migrant workers with no respect for locals, constant truck traffic, etc.

AND, the trucks run 24/7, all the time. I HATE IT. trying to enjoy a quiet evening, maybe a little campfire in the back yard, maybe sleeping with the windows open, FORGET IT.

IT F'N SUCKS!

and then when the drilling is done, then it's time to dig the pipelines, and then build the compressor station, and then it's time to refrac the wells after production goes down. it will never end. I'm 43, I'm not gonna put up with this shit for another 20 or 30 years. time to leave.
