If we would all rally around making sure it gets done right and is properly managed we would get a lot more positive response from the industry

This is what they are trying to prevent. The companies want to take out the gas that can be extracted cheaply and walk away with zero accountability. They don't want monitoring and accountability.

Quote:

please let me know when is the best time to shut off your gas and how riding horse back to work is in the dead of winter.

Give me a break. There are energy solutions that are not only cleaner but also cheaper. Nuclear power is the obvious example.
