Cuttalossa Creek in Bucks County?

I was at Solebury Orchards last weekend with the family for apple picking and noticed a small stream that just looked like a little spring creek that would hold fish. I looked it up and turns it that it's called Cuttalossa Creek, and it's actually being considered as wild trout water on the PFBC site. Looks like it dumps into the DE river after a few miles.

Anyone ever fish it? It's fairly close to my house, and looks challenging so I'm a bit intrigued by it, but not sure if it's worth it.
