Tried Pickering Creek for the first time today. Parked right by where the pin is on the paflyfish google map. Got there around 9am. The water level seemed good, and it was clear except for the leaves. The water temp was in the low 60's. The atmosphere was about 74 and sunny. I got a pair of rainbows on a size 16 tan caddis, and took a picture for a guy that got a real nice rainbow with a nymph (I didn't ask what kind).
