Decided to check this stream out after my mtn bike ride at high rocks. I checked out a couple spots a little ways up from river road but didn't see much. I got to the intersection of N. Sугan road and Cuttalossa noticed two bridges that both had some small fish that i could see. Water was very clear and the fish were not a skittish as i thought they would be. Brought two to hand on a PT (i think) and both were subsurface. Believe it or not, these are my first trout on a flyrod (just starter this summer) . Correct me if i'm wrong but i'm pretty sure they are rainbows. Both were in the 3" range.
