Our trip was good. The fishing was slow. The WB was very low so we didn't give it much attention. We stuck to the EB and the Main Stem. If you are still heading up, throwing streamers in the top sections of the rivers should get some nice browns to net. On cloudy days, have plenty of olive patterns. We ran into some good hatches the last 2 days. The fish were exceptionally selective but not very spooky. Good luck and enjoy. Remember to check your regulations book for the sections of river that close in a few days.
