I finally caught one on parachute black ant, went one day, got five takes, but for some reason I couldn't set the hook. went back the next day, caught a really nice brown for where I fish. I got so excited, I practically screamed in victory. I need to get back, haven't got a chance to fish for a while, schools been tough. I need to try the beetle as well, they seem very popular. I get so excited watching the trout take the dry flies, can't wait to get back!
