I've had the same problem with these, they're great until they fall off or move up and down on the leader. I'm with Tim Murphy on this, those turn-ons are great, they stay just where you put them. I only get the pimp out of necessity--when I'm out and that's all I have an option to buy. I used to use the ones with the toothpicks, but found it to be more of a pain to get on and off, although they are durable, don't move and won't fall off...unless you rip off a fly during a cast or in drift and pull up real fast 😁
